

WHO LIVES IN A WETLAND?

WETLANDS — what are they? Wetlands are low-lying areas between dry land and aquatic systems such as rivers, lakes or oceans. Once called swamps and thought to be of no use, wetlands really do many useful things, such as holding extra floodwater, purifying water and giving plants and animals a place to live. As you color this picture, see if you can name these plants and animals by matching the number to the correct name below.

- | | | | | |
|----------------------|----------------------|----------------------|--------------------------|---------------|
| ___ Pickerelweed | ___ Snowy egret | ___ Great blue heron | ___ Leopard frog | ___ Dragonfly |
| ___ White water lily | ___ Mottled duck | ___ Bluegill | ___ Red-winged blackbird | ___ Snail |
| ___ Raccoon | ___ Common gallinule | ___ Softshell turtle | ___ Mosquito fish | |

Answers: 1. Common gallinule 2. Softshell turtle 3. White water lily 4. Raccoon 5. Red-winged blackbird 6. Mottled duck 7. Great blue heron 8. Dragonfly 9. Leopard frog 10. Snail 11. Snowy egret 12. Pickerelweed 13. Mosquito fish 14. Bluegill
